RIVER FORECAST

Cal OES INLAND REGION

River Forecast – The following rivers are expected to meet or exceed Flood Stage:

Placer County:

- Truckee River at Truckee is forecast to be above flood stage at 4.7 feet the morning of 04/10/18. The river is expected to see flows between 4.5 feet and 4.7 feet through 04/15/18. Flood stage is 4.5 feet.
 - Flood Stage. Minor flooding from Bear Creek in the Alpine Meadows area to Truckee. Truckee River bike path between the River Ranch at Alpine Meadows Road to Tahoe City begins to flood. Basements and yards of some low-lying homes along the river begin to flood. Deep Creek Campground begins to flood. About 2270 cfs. USGS estimates this much flow has about a 1 in 4 chance of being exceeded any year.

River Forecast – The following rivers are expected to meet or exceed Monitor Stage:

Sutter & Yolo Counties:

• Sacramento River at Fremont Weir crested at 33.2 feet the morning of 04/09/18. As of 04/10/18 at 1600 hours, it is at 32.7 feet and continues to recede. Flood stage is 39.5 feet.

Merced County:

• Merced River at Stevinson is expected to crest at 67.7 feet the evening of 04/11/18. Flood stage is 71.0 feet.

WEATHER OF CONCERN

Weather of Concern

- A fast moving system will produce periods of medium to light rain and high elevation snow in portions of Northern California valley and mountainous locations through the evening today, 04/11/18.
- The National Weather Service has issued High Wind Warnings and Fire Weather Watches for portions of Central and Southern California for today, 04/11/18, through tomorrow evening, 04/12/18. The conditions will produce extremely high and dangerous cross winds associated with areas of blowing dust and sand.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

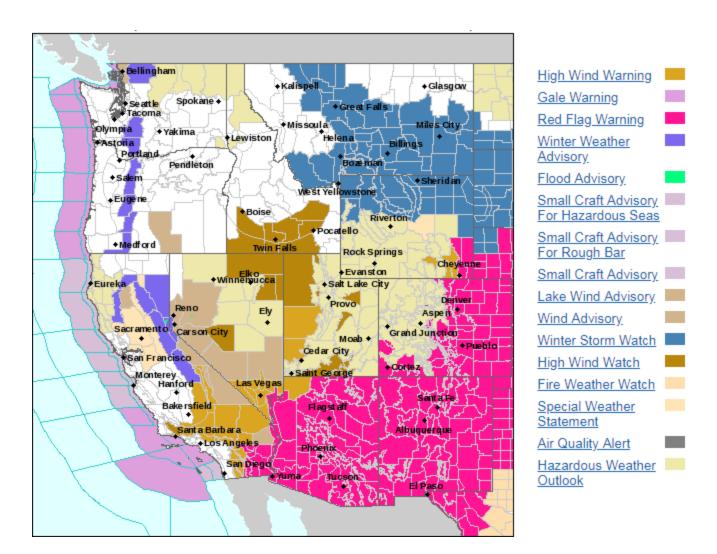

The next in a series of Pacific waves will swing over the area later today into Thursday. This wave will pack a little more of a punch compared to the previous. Expect light to moderate precipitation favoring the tonight period. Snow levels will also be much lower compared to the past few systems. Expect 3,000 to 4,000 foot levels starting tonight and lasting into Thursday. Gusty southerly winds will affect a large portion of the area today into this evening before the cold front moves through. Expect gusts between 40 to 50 mph favoring far northern and eastern portions of the region. Thursday's wind speeds will be lower and generally W-SW. Humidity levels will generally be on the higher side although some 20s will be observed across the Far Eastside Predictive Services Areas. Atmospheric ridging will affect the area Friday and Saturday. This means drier and warmer conditions with a lighter wind flow.

SOUTHERN CALIFORNIA

An approaching Pacific trough will bring much cooler temperatures to the region through Thursday. Maximum temperatures will be in the mid 50s to mid 60s across the mountains and 70s to low 80s in the valleys today, with mid 30s to mid 40s across the mountains and upper 50s and 60s in the valleys Thursday. This trough will also bring showers with up to an inch of rainfall over the Sierra tonight. The snow level will be around 6,000 feet. Westerly winds of 20 to 40 mph with gusts to 60 mph will surface across the mountain ridges and desert passes this afternoon through Thursday afternoon. On the back side of this trough, there will be northerly winds of 20 to 40 mph with gusts to 60 mph across much of Santa Barbara County, the Grapevine, and the Owens Valley Thursday night. Significant warming along with minimum humidity in the single digits and teens will occur Friday and Saturday as a ridge of high pressure builds into California from the Pacific Ocean. Local northeast winds of 10 to 20 mph with gusts to 35 mph will surface over the mountains and below the canyons and passes of Southern California Friday morning through Saturday morning.

WEATHER MAP

Cal OES LAW ENFORCEMENT MISSIONS

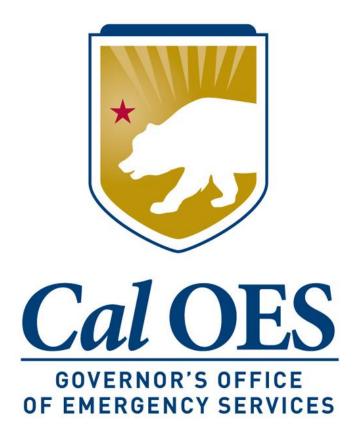

Cal OES Law Missions

• 2018-LAW-46158, 04/10/18, 1403 hours: Mendocino County Sheriff's Office (MCSO) requesting a SAR mutual aid regarding a missing family of 4, whose vehicle is believed to have gone into the S. Fork of the Eel River, North of Legget, on 04/06/18. Southern Humboldt County Technical Rescue accepted the mission. Cal OES LDO facilitated a request to the California National Guard so they can do a feasibility analysis of the area to further assist in prepping for this mission, should they be able to support it as conditions become suitable for additional assets to search for the missing vehicle and family. Mission Ongoing.

Cal OES MISSION TASKING

Cal OES Missions

- 2018-IREOC-45244: Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties. (On Scene Long-term assignment)
- 2017-SOC-44098: CalRecycle Debris Management Team in Ventura County (Coordinating)
- 2017-SOC-43821: DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- 2017-Inland-42559: Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
